

ACUNEX[®]
VARIO

INTRAOCULAR LENSES
WITH BLUE LIGHT FILTER

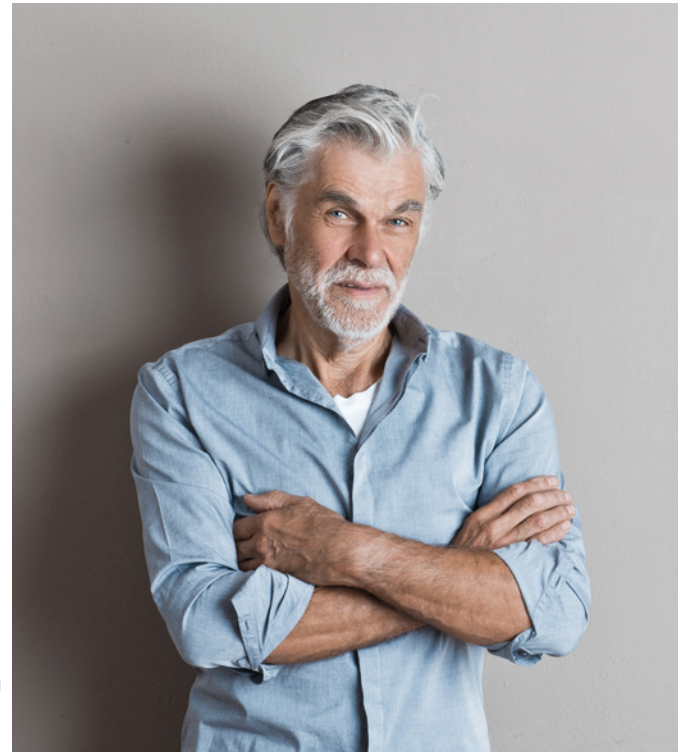

FOR DEMANDING
CATARACT PATIENTS

DEAR PATIENT,

nowadays, nobody must endure visual impairments due to cataract. Modern ophthalmology has excellent options for removing cataracts quickly, painlessly and permanently. Treatment with an ACUNEX® Vario intraocular lens (IOL) can achieve a new level of visual comfort that goes far beyond a standard solution!

This modern lens fulfils the desire for more spectacle independence in everyday situations, such as using your mobile, shopping or driving a car at night.

In short: the convenient solution for you if you want to take advantage of more than the standard treatment!

THE CONVENIENT SOLUTION FOR YOU!

Compared to a standard IOL, the special optics of the ACUNEX® VARIO intraocular lens are optimally tailored to the intermediate range (60 - 200 cm) providing additional depth of focus.

Distance vision
from 200 cm

Intermediate vision
60 - 200 cm

Near vision
up to 60 cm

MORE VISION WITH ADDED DEPTH OF FOCUS

All patients who pursue activities behind the reading distance benefit from this advancement. Compared to standard lenses, you are no longer dependent on special and expensive glasses, e.g. to support your intermediate vision.

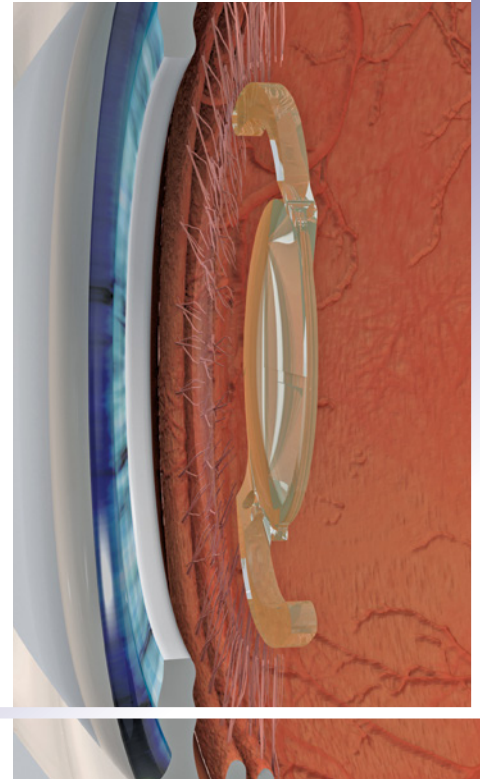

BENEFITS

MODERN ACUNEX® VARIO INTRAOCULAR LENSES MEAN:

- Optimal treatment of cataracts
- In most cases, computer or varifocal glasses are no longer necessary
- Extended depth of focus for more intermediate vision
- Improved contrast and twilight vision compared to standard lenses
- Avoidance of disturbing photic phenomena

FURTHERMORE, THE INCLUDED LIGHT FILTERS OFFER:

- Effective retina protection through blue and UV light filters
- Natural image quality and color perception
