

## CONSUMABLES

### myVISC BioPlus

Sterile 1.8% sodium saline solution

| Product                    | myVISC BioPlus   |
|----------------------------|--|
| <b>Concentration</b>       | 1.8% Na-Hyaluronate  |
| <b>Physical Property</b>   | Cohesive   |
| <b>Viscosity [25°C]</b>    | 210,000 mPa·s  |
| <b>pH-Value [25°C]</b>     | 6.8 – 7.6  |
| <b>Osmolality</b>          | 280 - 350 mOsmol/kg  |
| <b>Molecular Mass</b>      | 3.0 x 10 <sup>6</sup> Daltons  |
| <b>Content Endotoxin</b>   | ≤ 0.2 EU/ml  |
| <b>Composition</b>         | 18 mg sodium hyaluronate, phosphate buffer, sodium chloride, water for injection purpose   |
| <b>Manufacturing</b>       | Genetically produced by fermentation of bacteria hyaluronic acid   |
| <b>Package Size</b>        | 1.2 ml in sterile disposable syringes  |
| <b>Recommended Cannula</b> | 25 Gauge angled (enclosed)   |
| <b>Storage</b>             | At room temperature, protect from light  |
| <b>Shelf Life</b>          | 2 years  |
| <b>Application</b>         | <ul style="list-style-type: none"> <li>• High viscosity</li> <li>• Good spatial effect</li> <li>• For cataract surgery</li> <li>• Easy injection and removal</li> <li>• Excellent protection of endothelial and introcular epithelial</li> </ul> |
