Order  
Teleon products  
easily online

All in  
one App!

Hi, I'm Lenny and I'd like to  
introduce you to our new tool  
for even greater efficiency  
in your company.

# Simply more efficient: the new myTeleon app

Teleon offers cutting-edge solutions for cataract-surgery – ensuring highly efficient operations with excellent results.

The new **myTeleon Customer Suite software**, developed with high efficiency in mind, allows you to order Teleon products effortlessly online.

This app, available for desktop and smartphone, significantly optimises your ordering processes, offering a perfect overview of your orders and useful additional features like Messenger and Academy.

**Easy-peasy, super-fast  
and secure: Shop Teleon IOLs  
and consumables online!**

Order system

# Brilliantly easy to order

Conveniently, easily, and time-effectively order Teleon intraocular lenses and consumables; reorder frequently used products with a few clicks – and always stay organised.

That's precisely what the myTeleon Customer Suite provides with its efficient **ordering system**:

Convenient quick orders for ACUNEX, LENTIS, FEMTIS, and VISIOTIS IOLs and consumables

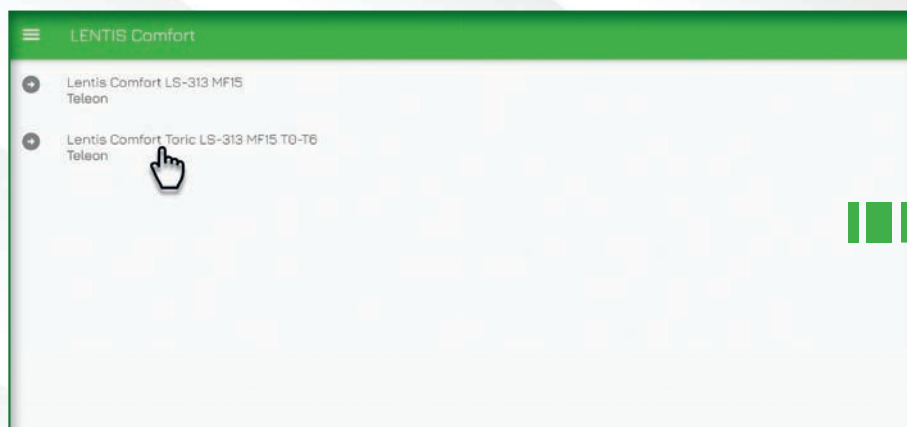

Simple consumption reporting for consignment goods – scan once and it's completed

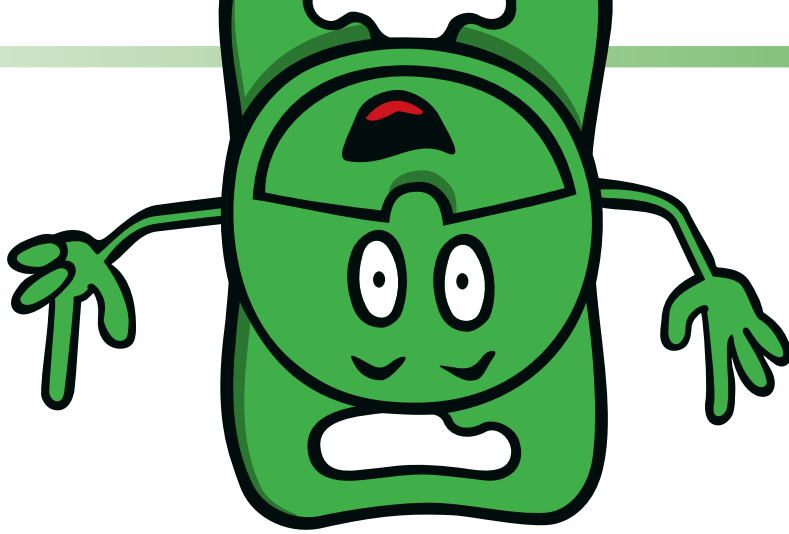

Ensure up-to-date order tracking and a comprehensive, clear order history

Flexible delivery and billing: Ship to multiple addresses and choose different billing addresses

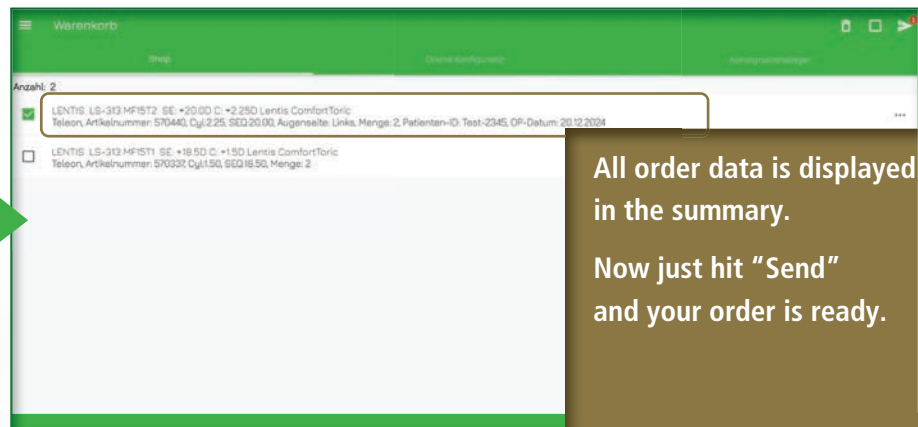

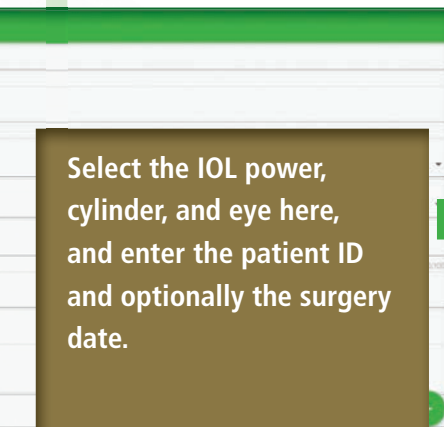

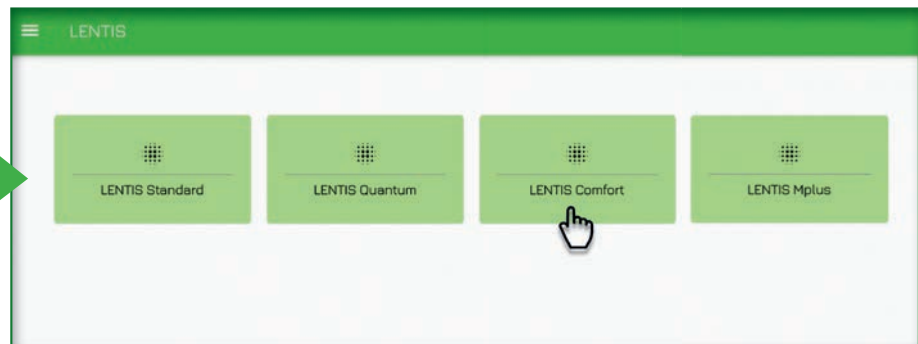

# It's that simple: Order in the online shop

Placing an order in our well-structured online shop takes just a few clicks. Here's how straightforward it is to order an IOL. It's just as fast for ordering consumables, of course.

Order system

Select the IOL power, cylinder, and eye here, and enter the patient ID and optionally the surgery date.

All order data is displayed in the summary. Now just hit "Send" and your order is ready.

Know what's going on:  
You can check the progress of  
your orders anytime.

Order system

# Always in the loop: Order tracking

Want to know the status of your orders  
and where they've been sent?  
Of course, myTeleon makes it possible!

Check the current status of your orders  
anytime.

We deliver your ordered products exactly where  
they're required – even to multiple addresses.

Avoid time-consuming internal tracking because you'll know  
exactly when and to whom something was delivered.

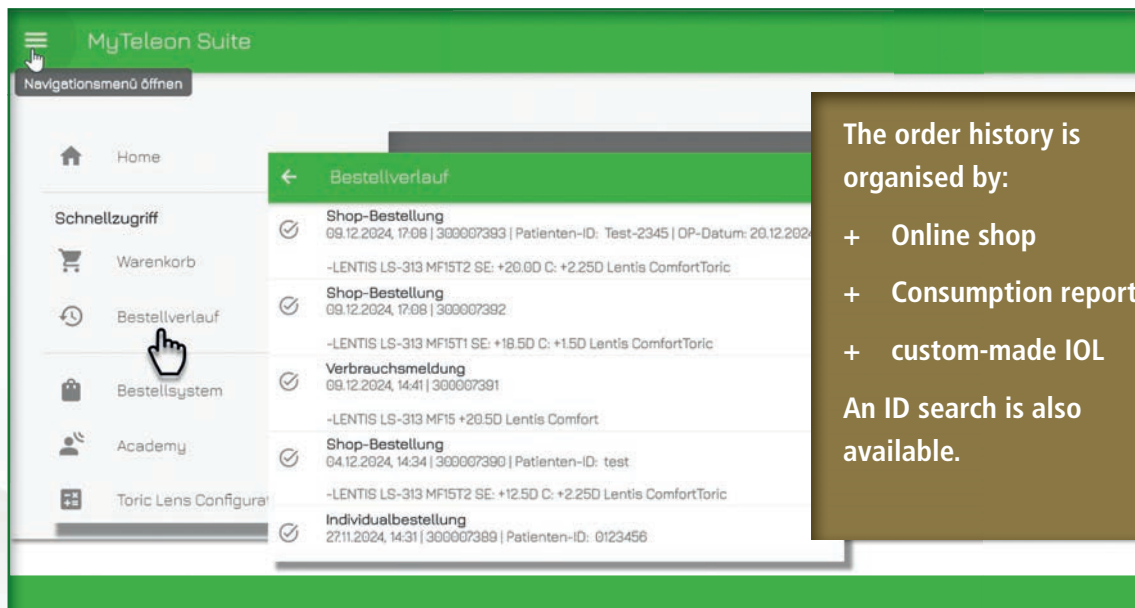

No more tedious searching for previous orders! With a single click, have everything in sight.

History

# Order history: all at a glance

The convenient order history gives an immediate, well-organised view of all orders and allows searches for specific IDs. This also makes reordering far easier and quicker.

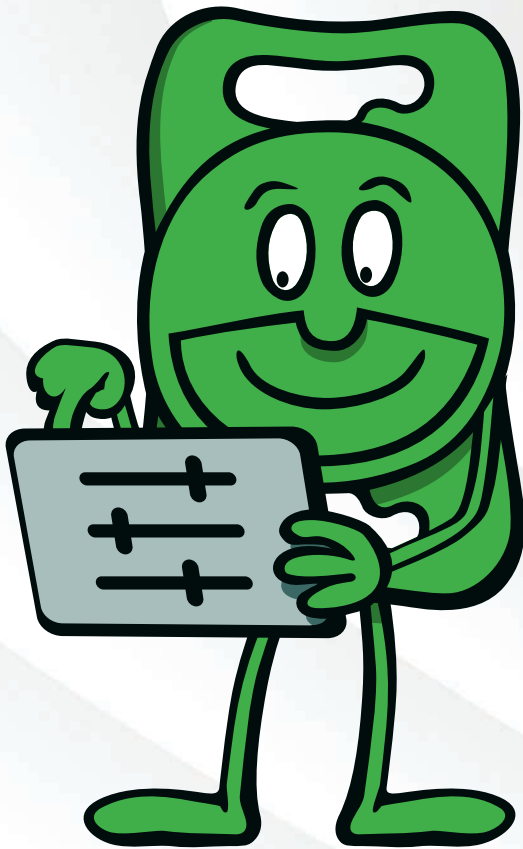

The order history is organised by:

- + Online shop
- + Consumption report
- + custom-made IOL

An ID search is also available.

# Individual IOL: Toric Lens Configurator

**Custom work is also quick! Toric IOLs can be configured and ordered directly in just a few clicks.**

With myTeleon, you can quickly and precisely configure and order custom-made toric IOLs straight away.

Functionalities like order tracking and order history are of course applicable to these IOLs too. Within the order history these are noted as “individual orders”.
