Designed for superior outcomes

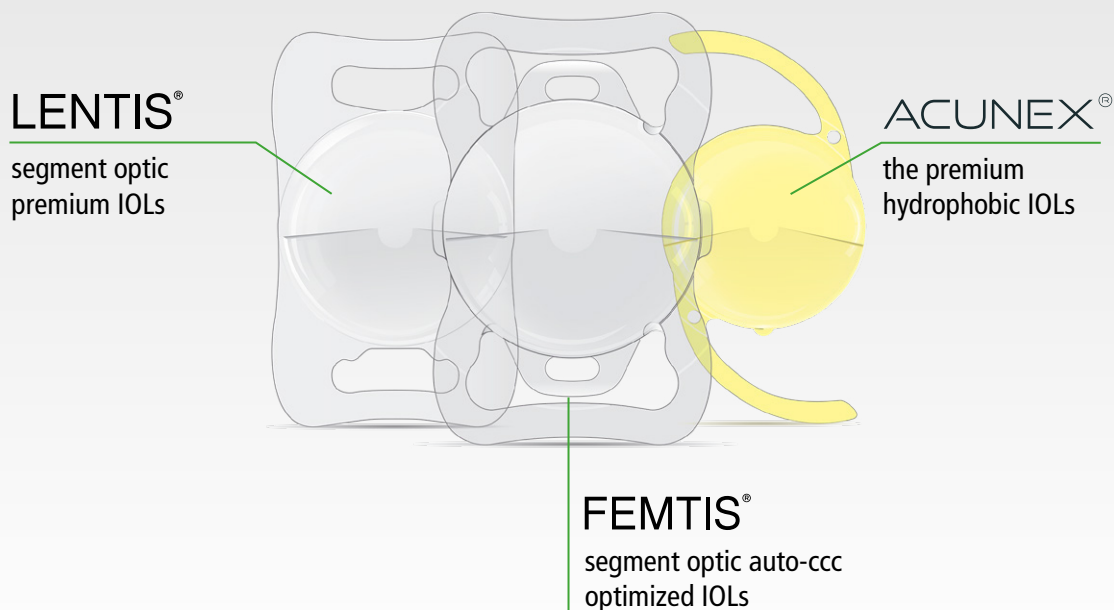

Driven by our maxim „Passion for Perfect Vision“, we present technologies that make a real difference. On 110 m², Teleon showcases cutting-edge solutions for modern ophthalmic surgery – from the latest intraocular lens innovations to advanced surgical systems.

Visit our Booths E.237 & E.145 – your hub for innovation, expert exchange, and future-ready eye care. Explore precision-engineered lenses tailored to individual needs, built on decades of expertise and aligned with the highest surgical standards.

Experience technologies that streamline workflows, enhance outcomes, and boost OR performance. Join our Expert Sessions for practical insights, engaging dialogue, and fresh perspectives.

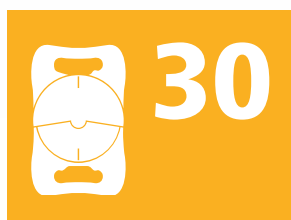

High-tech IOLs from Teleon

From standard and „enhanced“ monofocals to EDOF and premium lenses, our IOL portfolio is spread across 3 IOL platforms and is guaranteed to offer the perfect solution for every doctor and patient!

The IOL-Highlight

The LENTIS Mplus Family got a new member! Now also available as standard multifocal-toric IOL!

LENTIS® Mplus^{toric}
LS-313 MF30T0-T7

One-piece multifocal-toric posterior chamber lens for optimised depth of focus with aspherical surface

High-tech devices you can experience

Explore a comprehensive range of high-quality devices, and systems from the Teleon portfolio - featuring key highlights in cataract and glaucoma treatment:

ALLY &
LASE
are CE Mark
approved

Femto-Phaco:

ALLY Robotic Cataract Laser System

Experience the Industry's First Robotic Cataract Laser System.

Only the ALLY Robotic Cataract Laser System combines robotic intelligence and precision with surgeon expertise, empowering you to provide premium cataract experiences with optimal treatment outcomes and efficiencies to more patients.

Seize new opportunities and help your practice thrive with an ALLY by your side.

www.lensar.com

Glaucoma:

VIA LASE is focused on fueling the practice of noninvasive interventional glaucoma with the introduction of the world's first femtosecond laser, image-guided, high-precision trabeculotomy (FLigHT) for open-angle glaucoma.

"The ViaLase Laser marks a major advancement in glaucoma care, offering surgery-like results without opening the eye – reducing risks linked to invasive procedures," said Tibor Juhasz, PhD, Founder and CEO of ViaLase, Inc. "Early clinical data show that FLigHT safely and effectively lowers intraocular pressure (IOP). We're excited to work with our distribution partners to bring this innovative technology to physicians and patients across Europe."

BROCHURES

new visual design for our brochures

Just in time for the ESCRS Congress, our brochures will debut completely new cover visuals for our [LENTIS & FEMTIS intraocular lenses](#). Combining urban energy with the power of nature, the visuals highlight what our advanced intraocular lens optics could mean for visually impaired patients: true visual freedom for everyone, everywhere.

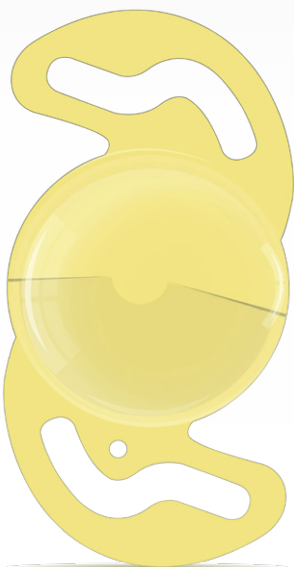

PARTNERS

at our booth E.237 & E.145

We welcome two trusted partners at our booth, each contributing leading-edge solutions in ophthalmic diagnostics and intraocular lens technologies.

The company is a global manufacturer of ophthalmic diagnostic systems, specializing in electrophysiology and imaging. The RETI-port/scan 21 supports VEP, ERG, EOG, and multifocal stimulation tests. It features a biosignal amplifier with a patient-side preamplifier, automatic analysis, and centralized data storage for efficient diagnostics.

IO expert®

IO Expert is a young, dynamic company specializing in intraocular lenses for cataract surgery. Combining proven products with dedicated service, it supports surgeons in achieving optimal results and improving vision worldwide. With the **VISIOTIS IOL family** the company offers hydrophilic IOLs with toric and multifocal properties.

EVENTS

Teleon's Expert Sessions

Get inspired by compact and practice-relevant sessions from leading ophthalmic experts. Whether it's innovative IOL strategies, surgical precision, or patient communication – our Booth Talks deliver fresh perspectives tailored to everyday clinical routines.

Podcast Booth Talks

**Prof. Thomas Kohnen (Germany)
& Dr. Patrick Versace (Australia)**
Sunday 14.09.2025, 13.30–14.15

Part 1:

Vision Classification in accordance with ESCRS
(IOL categories and vision ranges)

Part 2:

Subsumption of the Teleon optical designs according
to ESCRS functional vision classification (Quantum,
Comfort/Vario (MF15/MF20), Mplus/VarioMax (MF30))

Part 3:

Patient Communication

How to educate patients on the results they can expect?
Limitations and required conditions for practices

Booth Talks

Sandro Soldati, MD, Italy

Saturday, 13.09.2025, 12.30:
„FEMTIS: Precision is nothing without stability“

Prof. Corinne Dot, MD, France

Saturday, 13.09.2025, 10.30:
„LENTIS Comfort und Comfort Toric – Pioneering
EDoF Technology“
